

Postdoctoral Scholar:

The Department of Earth System Science at the University of California, Irvine (UCI) seeks a postdoctoral research associate to work on innovative research in tropical atmospheric dynamics, with close collaboration with groups in Computer Science (Center for Machine Learning and Intelligent Systems) and Statistics at UCI. The successful candidate will work on topics relevant to tracking of tropical disturbances and variability in the ITCZ. The research will focus on relating tracks (including genesis and lysis), ITCZ activity and intensity of disturbances to the atmosphere/ocean state.

Scientists with a strong background in tropical meteorology and possessing excellent computational and statistical skills are encouraged to apply. A PhD in atmospheric or related sciences is required. The initial appointment is for one year. Annual salary depends upon qualifications, starting at \$42,780. The appointment includes medical, dental and vision insurance.

Please send a CV with the names of three references to:
