

MS009: Dynamics and Predictability of Severe Weather Events (ICDM)

Total abstracts submitted: 5

Abstracts waiting for acceptance: 5 - Accepted Abstracts: 0 - Rejected Abstracts: 0

Sponsoring Association: **IAMAS**

This symposium invites papers on all aspects of severe weather events on synoptic scales and smaller, and their predictability. All studies that relate to the global programme THORPEX will be appropriate for this session. This includes dynamical processes and their predictability, observing systems, data assimilation and observing strategies, and societal and economic implications. This session will cover factors affecting the predictability of weather events on one-day to sub-seasonal time scales."

Convener

Designated:
Istvan Szunyogh,
Department of Atmospheric and Oceanic Science,
University of Maryland, College Park Maryland, USA
Tel.: (1)-301-405-4841;
Fax: (1)-301-314-9363,
szunyogh@ipst.umd.edu

Co-Convener

Designated:
Richard Swinbank, Met Office, richard.swinbank@metoffice.gov.uk
