Scholar-In-Residence and Faculty Director
Lockheed Martin Engineering Management Program
College of Engineering and Applied Science
University of Colorado Boulder

The Lockheed Martin Engineering Management Program (EMP) in the College of Engineering and Applied Science (CEAS) at the University of Colorado Boulder is seeking a Scholar-in-Residence and Faculty Director to lead the EMP in continuing its historical growth as a high-quality graduate program in a nationally-recognized engineering school. The EMP provides advanced technical management education for working engineers preparing for early management assignments. The program offers an M.E. degree and various graduate certificates in Engineering Management with courses offered in a traditional classroom setting, which are presented to both on-campus and distance students both synchronously and asynchronously, on a worldwide basis. Faculty members in the program develop learning partnerships with companies, which regularly sponsor students for the program and use these partnerships to maintain currency in management methods and as learning laboratories. The program supports and utilizes distance education methods for the delivery of its curriculum and conducts research in the enhancement of these technologies.

The Director of the Lockheed Martin Engineering Management Program is responsible for the overall direction, leadership, and management of the program including planning; budgets; personnel hiring and evaluation; developing partnerships with national and international companies, educational institutions, and organizations; marketing the program to prospective students; program admissions; and curriculum development. The Director is responsible for the supervision of the program faculty including both full-time and adjunct faculty members, and EMP support staff.

The Director also serves as a non-tenure-track faculty member in the program, holding the rank of Scholar-in-Residence, teaching graduate courses and providing service to the University, College, and community.

Additional information related to the EMP at CU can be obtained via emp.colorado.edu. To apply for this position go to jobsatcu.com and search for posting number 815168. Questions associated with this position may be directed to Dr. Jeffrey Luftig, Chair, EMP Director Search Committee (Jeffrey.luftig@colorado.edu). Applications for this position will be accepted until November 1, 2011.
